

## EWC Companies

2019 Winner:

### **NERv**

NERv's patent-pending solution is a sensory platform capable of detecting leaks within minutes of incidence. Their first product will focus on detecting anastomotic leakage, or the leakage of content from within the gastrointestinal tract into the abdominal cavity after surgery.

2019 Runner Up:

### **Koniku**

Koniku builds living machines or cyborgs which combine living

cells with silicon to detect volatile organic compounds in the air.

Current applications range from security to global healthcare on demand.
